"I ended up moving here January 2016 and jumped right in," Vazquez said. "I told myself that if I moved again, I would move somewhere that didn't have snow and ice storms."

Vazquez, who was then interim dean of the School of Arts and Sciences, expressed to Vega that she reached a point of capacity there and reached out to her mentor at the time, Dr. Victor Vega. She came to the College in January 2016 after teaching in Wilberforce, Ohio for three years. Averett shared her experiences with challenges of their parents and how that impacted their academic journey.

Averett said. She decided to attend graduate school in order to have more time to figure out her career in math. Averett went on to explain that she knew she wanted to teach math and thought she wanted to teach high school math. She then realized she didn’t want to teach high school math, and she decided to become a math professor.

Ohio State University through a scholarship she received while in the sixth grade. The Young Scholars Program is a scholarship for students who graduate in the top 5% of their high school class.

Ohio State is a research university that offers students many opportunities to engage in research. They have the chance to work with professors on projects and gain hands-on experience in their field of study. These opportunities help students to build their resumes and make connections in their field.

However, their achievement includes being the first two African American women to earn tenure since the College became a four-year institution. The Young Scholars Program is a scholarship for students who graduate in the top 5% of their high school class.

Dr. Courtenay Miller recently earned tenure at the College and joined the ranks of other tenured faculty. As being published, achieving the status of tenure is a defining moment for many. Dr. Syvillia Averett and Dr. Courtenay Miller recently earned tenure at the College and joined the ranks of other tenured faculty.
